

## NPORS Plant Operators Cards

During 2022, Morgan Sindall Construction communicated that we would now be accepting NPORS plant operator's cards provided they were the version that displayed the **CSCS logo**. (see previous SHE Bulletin [here](#))

During a number of recent project audits, it has become apparent that a number of plant operators on our projects hold the non-CSCS version of the NPORS card (Bottom image)

**Only NPORS Cards displaying the CSCS logo (as can be seen in the top image) are accepted as proof of competence.**

The above requirement is also mandatory for all other ancillary trades such as Appointed Persons, Slingers etc.

### Action for all projects

- Review the competence cards of all plant operators at your project location.
- Ensure they have a card from a scheme recognised by Morgan Sindall Construction such as CPCS, IPAF, ALLMI.
- Any operator whose only means of demonstrating competence is a non-CSCS NPORS card must be prohibited from operating that item of plant and their employer notified of this requirement.
