

### Transformer Handling – Armorguard T-Kart

To reduce manual handling and mitigate the risk of injuries, specialised equipment is to be considered Best practice when moving of services transformers is required.

- The Armorgard T-Kart is a trolley designed specifically for transporting services transformers.
- It has been designed with lifting capabilities to cover all common sizes of the transformer taking a maximum weight of 200kg.
- Using T-Kart enables one person to safely handle moving of services transformers on short or long distance.
- Armorgard T-Kart must not be operated by anyone who hasn't completed product familiarisation training.
