

Occupational Health Resources

As part of our continued focus on occupational health risks we have developed a basic guide to occupational health management to support the supply chain in understanding their responsibilities.

This guide contains information on the key health risks in construction, links to useful Morgan Sindall and industry resources, and a basic auditing tool to assist them in reviewing their level of compliance with occupational health requirements.

It is not a mandatory requirement for all subcontractors to complete the occupational health audit on each of our projects but is provided to support those contractors who do not have an audit checklist of their own. However, projects may request contractors to undertake this if they wish.

This guide, and an updated version of CASSE, will be formally communicated to all supply chain partners during week commencing 16th June 2025.

The guide has been added to the Occupational Health Page on The Core and can be found by following this link. [CORE: Occupational Health](#)

What can projects do to promote Occupational Health with the supply chain:

- Provide a copy of this guide to supply chain partners currently working on your projects.
- Discuss the guide and the contractor's occupational health arrangements at SHE Pre-starts. A revised CASSE document and SHE Pre-start template has been released to support this. See links here: [\(SHE Pre-Start\)](#) [\(CASSE Document\)](#)
- Ensure that RAMS include requirements for occupational health using the revised [RAMS Review Record](#). The SIMS RAMS tool will also be updated to include occupation health information as part of the next release (expected w/c June 16th)

Use of Sound Level Meters

In addition to the above, we have also produced a simple guide to support project teams in undertaking sound level monitoring using the basic sound level meter you have been provided with. [Link to Sound Level Monitoring Guide](#)

If your project does not have a sound level meter, please contact your local SHE Team who can arrange this for you.
